Work Experience

American Forests, Senior Manager of Data Science

40 hours/week, May 2020 - Present

- **Tree Equity Score:** Delivered first-of-its-kind national Tree Equity Score; covered in NYTimes and many local news outlets.
 - Solely developed data processing pipelines that calculate the Tree Equity Score for over 150,000 neighborhoods in 486 US cities; combining over 25 datasets (2,558 satellite tiles, 14,586 census files, & several tree canopy datasets).
 - Developed an user-friendly interactive web map and impact calculator for exploring the Tree Equity Score and a deep-dive analysis tool for urban foresters & city planners to set equity-focused tree canopy goals and plan the exact parcels that they want to plant trees on (Tree Equity Score Explorer & Analyzer); over 30,000 users combined.
 - Exceeded goal of calculating Tree Equity Score for 5 cities, instead delivering it to 486 municipalities.
 - Wrote and built data stories about the intersections between tree canopy and race, poverty, and health.
 - Communicated data engineering methods to technical & non-technical audiences (ranging from peers at a data conference to Detroit city planners).
- **Interactive Web Mapping:** Created web map and database of over 1,400 tree planting & urban forestry projects going back to 1990. Developed career pathways interactive web map to help users access career opportunities in urban forestry.
- **Technology Management:** Helped clean and manage CRM and assisted in the management of its GIS & IT infrastructure. Collaborated with database stakeholders to improve data quality, enabling more informed fundraising.
- **In Progress:** analysis and visualization of tree species migration under various climate action scenarios; developing an AI model to derive tree canopy data from satellite images, creating free and open tree canopy data nationwide for the first time.

Red Hat: AI Center of Excellence AI Research Intern

40 hours/week, May - August 2019

- Designed internal data processing pipeline to clean and featurize client interaction data for AI Natural Language Processing
- Researched NLP question and answering and text generation techniques, working towards a client-facing chat bot
- Identified structural issues with the state of the art NLP techniques that block approaches scalable solutions

Red Hat: Open Innovation Labs Site Reliability Engineering Intern

40 hours/week, May - August 2018

- Worked directly with the software reliability engineering team to solve pressing back log items to stabilize dev-ops pipeline
- Automated infrastructure deployment of Open Shift and all relevant tooling, saving an estimated 100 hours per client
- Built search feature for the Open Practice Library from scratch to increase access to the library
- Participated in the Open Innovation Lab's DevOps Enablement training: learned Agile and DevOps best practices

Education

University of Virginia

Undergraduate GPA: 3.5, Graduate GPA: 3.7

Bachelors of Arts, Computer Science '19 Honors: Jefferson Scholar (full ride merit scholarship), Echols Scholar, Dean's List

Masters of Computer Science (3 + 1) '20 Focus: Deep Learning, Algorithms, Cryptography, Social Impacts of Technology

Teaching

Graduate Cryptography Graduate Teaching Assistant

5 hours/week, January - May 2020

- Hold 1.5 weekly office hours for a class of 30 students, as sole TA, and proof read all 5 homework assignments
- Grade 5 homework assignments & take home exam for all 30 students, and write test cases for 2 programming homeworks

Student Led Class: Digital Governance Lab Student Instructor

5 hours/week, August - May 2020

- Developed public interest technology curriculum to critically examine the impacts of digital technology (13 seminars/semester)
- In the Fall, taught to 8 students (5 tech & 3 policy), culminating in a critique of senior engineering capstone projects
- In the Spring, taught to 6 students (4 tech & 2 policy), each developing their own public interest tech policy or project

Algorithms Head Teaching Assistant

20 hours/week, January - May 2018

- Managed team of 5 TAs and organized review sessions twice a week to recap content
- Edited 10 homework assignments, designed 2 exams, at least 3 test cases per homework, & managed auto-grading tools

Introduction to Computer Science Teaching Assistant

10 hours/week, January - December 2017

- Led 2 lab group review sessions per semester, graded 20 homework assignments/exams for over 20 students each semester
- In first semester, helped over 180 students, most of any other TA

Skills

Programming Languages: Python, Java, C++, C, Javascript, R, Rust, Typescript

Tools: L^AT_EX, Pytorch, Tensorflow, Ansible, Docker, Django, React, NextJS, Markdown, Arcpy, GeoPandas, Mapbox, Git
